In addition, applicant notes with respect to any information that is not in English language as follows:

Reference E) describes bearings (2) which can be produced by injection molding and are used in electric motors of audio recording and/or reproducing apparatuses.

Reference F) describes a clock for a motor vehicle and having a clock housing (2) mounted on a holder (3) by a bayonet lock. An electric contact on the housing enables an electrical connection to be made with the holder. The holder has electrical contacts (18) which engage the housing's electrical contacts (17) when the holder is in a position where it is joined to the housing.

Reference G) describes a bearing housing includes a mounting part (1) and an insert (4). The mounting part has fastening elements (2, 3) and a central recess (5) for receiving the insert which accommodates bearing chamber (6), the shaft channel (7) and the sealing chamber (8).

The above-identified application discloses and claims an invention patentable over this prior art. Entry of the references above set forth into the file of the above application is believed to be in order and is respectfully requested.

Respectfully submitted
